

The 1-Minute Handoff Rule

Quick reference essentials for everyday employee-generated content

THE RIGHT FORMAT

Use photos for static milestones; use video when movement, voice, or sound tells the story best.

FACE THE LIGHT

Position your subject facing the main light source to keep faces bright, sharp, and clear.

FRAME THE SUBJECT

Keep the main action front and center. Eliminate background distractions by getting closer to the subject.

CLEAR AUDIO

Minimize audio noise by standing next to the speaker when recording speech.

1-MINUTE HANDOFF

Always attach a brief note stating who is featured, what is happening, and where.
